Dear John:

We have processed invoices numbered 5000-1 and 5000-2 for payment in the amount of \$28,600.58 which is \$15,711.06 less than the amount billed.

The overbilling resulted because you failed to deduct the amount billed on invoice No. 1 from invoice No. 2. Each invoice processed should show total expenses from inception of contract to date of invoice and then a reduction should be made for any amounts previously claimed against the agreement.

Yours very truly,

Doug
